Install Jenkins

Step 1. First we have to install java JDK.

#yum install java-1.7.0-openjdk

Step 2: install Apache server

#yum install httpd

Step 3: Add Jenkins Repository

sudo wget -O /etc/yum.repos.d/jenkins.repo http://pkg.jenkins-ci.org/redhat/jenkins.rep

sudo rpm --import https://jenkins-ci.org/redhat/jenkins-ci.org.key

Step 4: Install Jenkins

```
yum install jenkins
```

Step 6: Start the Jenkins service

#systemctl start jenkins

#systemctl enable jenkins

Step 7. Access Jenkins.

Finally, after the installation is complete you can visit the following address in your browser
